### DETAILED ACTION

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6 and 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shurtleff (5,795,462) in view of DE 20118966.

Shurtleff discloses substantially the apparatus as claimed. See the entire document. The apparatus of Shurtleff differs from the claimed invention in that claim 6, for example, recites “a check valve located in the air inlet pipe and preventing back flow of the air and the solvent fuel” DE ‘966 discloses the concept of utilizing a one way return valve (corresponding to the claimed check valve) to prevent the petrol flowing back into the container. Given that concept [In re Bascom, 230 F. 2d 612, 109 USPQ 98 (CCPA 1956)], one would have been led to modify Shurtleff’s apparatus by incorporating the one way return valve, a check valve, of the DE ‘966, as in claim 6, motivated by the reasonable expectation of avoiding return of materials to the same container for safety reason, and to thereby reduce the heat required to vaporize the solvent liquid fuel to gaseous fuel.

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shurtleff '349 is basically the same as Shurtleff '462.
